

MANANGOS

fork of the fork of another fork

Introduction to Manangos

Manangos is a non-profit project that aims to create a safe environment for crypto beginners to learn and explore within the cryptocurrency marketplace. For the team and community, Manangos provides an opportunity to join a crypto project that is exciting and educational with tremendous utility. The token is currently available on both the Stellar and Vite blockchains, and it includes utilities such as staking, token swap and play-to-earn functionality.

This premier stone-fruit cryptocurrency is built on the Stellar Blockchain. Confidence is guaranteed with the convenience, interoperability, and expeditiousness that Manangos provides! The token is a humble offshoot of Ananos, which is an offshoot of Banano, which itself is a fork of Nano.

Yes, Manangos is a "fork of the fork of another fork," a tongue-in-cheek reference to Ananos, which in turn is based off of Banano, a fork of the cryptocurrency, Nano. The fork of the fork of another fork, never tasted so good. This high powered stone fruit cryptocurrency is rich in vitamin C and folate.

Just hang out and share your favourite memes with a fun community of like-minded fruit junkies.

\$MANGO Token

The \$Mango token was launched in November 2021 as the first component of the Manangos ecosystem. Although this token was intended to have a much smaller supply of approximately 55.9 million tokens (equivalent to the world output of mangos in 2019, in tons, with the main producers being India, Indonesia, China, Mexico, Pakistan, and Brazil), as depicted in the map below, the token was eventually created with a total supply of slightly more than 52 billion tokens (with a multiplier of 10^3 times the initial plan)

The Manangos Ecosystem

Faucets & Airdrops

The Manangos token has a web faucet that pays out a random amount of \$MANGO, between 250 and 500, to individual wallets once every 24 hours. Faucets are free and secure methods of receiving cryptocurrency. To receive Manangos, simply copy and paste your public wallet address into the empty field and solve the captcha. The links for facets are provided in this document's "Links" section.

Members of the Discord server also receive \$MANGO airdrops twice a month, in addition to the server's occasional airdrops and giveaways.

Community

Manangos is aiming to create a safe environment for crypto beginners. A community in which everyone, regardless of their diverse backgrounds, feels a sense of belonging and respect.

Community members in the discord server are provided with numerous channels to interact with one another and also with the server bots. Features of the server include:

- Crypto Exchange Bots and Trading
- NFT Auction House
- Contest Events
- Gaming Corner and
- Mangoverse

Tokenomics

The total supply of \$MANGO is 52,000,069,420 tokens and all tokens have been minted. No more \$MANGO will ever be created.

Public Distribution

As a project built for the community, a significant portion of the total supply (80%) is reserved for public distribution

- 60% of the total supply will be distributed through airdrops, staking rewards, and other community activities or opportunities
- 20% of the total distribution will be distributed through games and other events organized within the community

Road Map

Launch Phase

- Website launch
- Vitex listing
- Memes and emoji development

Current Phase

- Monthly airdrop in Discord server
- Tipbot hosting in Discord
- Mango Staking
<https://stake.vitc.org/>
- Additional Manangos Faucet (Vite)

Future Plans

- Get listed on an exchange coingecko etc.
- More Liquidity Stellar/Vite Pairs including \$Aqua
- Stellar Discord Tipbot

Disclaimer

Investing in \$MANGO, like any other cryptocurrency or form of investment, poses the risk of losing money over time. Keep in mind that cryptocurrencies can be a high-risk, volatile investment.

By moving forward with the purchase of \$MANGO, it is assumed that you are aware of the risks and accept that there is no assurance that all of the objectives outlined in this whitepaper will be achieved in the manner and by the specific deadline specified.

Before making any financial decision regarding this project, conduct your own research (DYOR) or seek advice from your financial advisor.
